Please find below and/or attached an Office communication concerning this application or proceeding.

<b>Office Action Summary</b>	Application No.	Applicant(s)
	09/781,496	ARAI, TOSHIYUKI
	Examiner	Art Unit
	Barbara N. Burgess	2157

-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

#### Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

#### Status

- 1) Responsive to communication(s) filed on 22 July 2005.
- 2a) This action is FINAL.                            2b) This action is non-final.
- 3) Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

#### Disposition of Claims

- 4) Claim(s) 1-9 and 20 is/are pending in the application.
- 4a) Of the above claim(s) \_\_\_\_\_ is/are withdrawn from consideration.
- 5) Claim(s) \_\_\_\_\_ is/are allowed.
- 6) Claim(s) 1-9 and 20 is/are rejected.
- 7) Claim(s) \_\_\_\_\_ is/are objected to.
- 8) Claim(s) \_\_\_\_\_ are subject to restriction and/or election requirement.

#### Application Papers

- 9) The specification is objected to by the Examiner.
- 10) The drawing(s) filed on \_\_\_\_\_ is/are: a) accepted or b) objected to by the Examiner.  
Applicant may not request that any objection to the drawing(s) be held in abeyance. See 37 CFR 1.85(a).  
Replacement drawing sheet(s) including the correction is required if the drawing(s) is objected to. See 37 CFR 1.121(d).
- 11) The oath or declaration is objected to by the Examiner. Note the attached Office Action or form PTO-152.

#### Priority under 35 U.S.C. § 119

- 12) Acknowledgment is made of a claim for foreign priority under 35 U.S.C. § 119(a)-(d) or (f).
- a) All    b) Some \* c) None of:
  1. Certified copies of the priority documents have been received.
  2. Certified copies of the priority documents have been received in Application No. \_\_\_\_\_.
  3. Copies of the certified copies of the priority documents have been received in this National Stage application from the International Bureau (PCT Rule 17.2(a)).

\* See the attached detailed Office action for a list of the certified copies not received.

#### Attachment(s)

- 1) Notice of References Cited (PTO-892)
- 2) Notice of Draftsperson's Patent Drawing Review (PTO-948)
- 3) Information Disclosure Statement(s) (PTO-1449 or PTO/SB/08)  
Paper No(s)/Mail Date \_\_\_\_\_.
- 4) Interview Summary (PTO-413)  
Paper No(s)/Mail Date. \_\_\_\_\_.
- 5) Notice of Informal Patent Application (PTO-152)
- 6) Other: \_\_\_\_\_.

## DETAILED ACTION

This Office Action is in response to Amendments filed July 22, 2005. Claims 1-9, 20 are presented for further examination.

### ***Claim Rejections - 35 USC § 102***

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

2. Claims 1-9, 20 are rejected under 35 U.S.C. 102(e) as being anticipated by Klug et al. (hereinafter "Klug", US 6,823,327 B1).

As per claim 1, Klug discloses an information processing apparatus terminal device, capable of transmitting information comprising:

- Receiving means receiving a request signal transmitted from the terminal device (column 2, lines 7-10, 37-41);
- User identifier generating means for generating identifier corresponding to request signal (column 2, lines 13-15, 41-45);
- Generation source identifier storage means storing a generation source identifier identifying a source of where the user identifier is generated (column 2, lines 13-15, 41-45)

- User transmitting means for transmitting the user identifier and the generation source identifier to the terminal device (column 2, lines 7-10, 37-41, column 11, lines 8-13, 43-50).

As per claim 2, Klug discloses the information processing apparatus according claim 1, wherein the receiving means receives the request signal requesting the information processing apparatus to issue a user password identifying a user operating the terminal device and to issue an introduction password indicating the generation source of the user password (column 2, lines 13-31).

As per claim 3, Klug discloses the information processing apparatus according claim 2, wherein the receiving means receives individual information of the user operating the terminal device (column 1, lines 47-60).

As per claim 4, Klug discloses the information processing apparatus according to claim 3, wherein the receiving means receives request signal requesting issue of the user password and the introduction password that are used for accessing homepage information contained within an other information processing apparatus, specifies the homepage information the information processing apparatus that introduces the homepage information of the other information processing apparatus (column 2, lines 5-25, column 4, lines 24-33, column 5, lines 1-7, 18-25).

As per claim 5, Klug discloses the information processing apparatus according to claim 3, further comprising individual information storage means for storing the received individual information (column 5, lines 14-17, 29-31, 35-38).

As per claim 6, Klug discloses the information processing apparatus according to claim 5, wherein the user identifier generating means generates a user password corresponding to the received individual information, and transfers the generated user password to the individual information storage means that stores the transferred user password correspondingly to the individual information (column 2, lines 7-10, 37-41, column 11, lines 8-13, 43-50).

As per claim 7, Klug discloses the information processing apparatus according to claim 1, wherein the generation source identifier storage means stores the generation source identifier identifying homepage information (column 5, lines 14-17, 29-31, 35-38).

As per claim 8, Klug discloses the information processing apparatus according to claim 7, wherein the generation service identifier storage means stores an introduction password as the generation source identifier identifying the homepage information (column 5, lines 14-17, 29-31, 35-38).

As per claim 9, Klug discloses the information processing apparatus according to claim 1, wherein the user identifier and the generation source identifier are used when the terminal device accesses information contained within an other information processing apparatus, and the transmitting means transmits the user identifier and the generation source identifier to the other information processing apparatus (column 2, lines 5-25, column 4, lines 24-33, column 5, lines 1-7, 18-25).

As per claim 20, Klug discloses an information processing method comprising the steps of:

- receiving a request transmitted from a terminal device (column 2, lines 7-10, 37-41);
- generating a user identifier corresponding to the request (column 2, lines 13-15, 41-45);
- transmitting the generated user identifier and a generation source identifier to the terminal device, wherein said generation source identifier is stored in an information processing apparatus and identifies a source where the user identifier is generated (column 2, lines 7-10, 37-41, column 11, lines 8-13, 43-50).

***Response to Arguments***

**The Office notes the following arguments:**

- (a) The generation source identifier that identifies the source where the user ID is generated does not exist in Klug.
- (b) The generation source identifier is not transmitted to the terminal device.
- (c) Klug does not show or suggest the use of a generation source identifier that is stored in the generation source identifier storage means.

3. Applicant's arguments filed have been fully considered but they are not persuasive.

**In response to:**

- (a) Klug discloses the registration website providing the user with a user ID and password. This user ID and password is used at a new website to register the user. The user provides the new website with the user ID and password as well as an indication that any further information may be obtained from the registration website that provided the user with the user ID and password. The new website is able to retrieve the user's registration information from the registration website in order to register the user at the new website (column 2, lines 5-22, 39-50). Klug further discloses the user having the option to interrogate the registration website for the user ID and password if it is not found locally at the client (column 18, lines 60-67, column 19, lines 1-5). Therefore, Klug, indeed, discloses a generation source identifier that identifies the source where the user ID is generated.

(b) Klug discloses the user's registration information being stored locally on the user's client node. Also, when the user registers with a third party website using the locally stored registration information, a message is sent from the registration module on the client device to the registration website. Therefore, the client must have the registration website's identifier stored (column 2, lines 58-61, column 15, lines 43-50). Therefore, Klug, undoubtedly, discloses the generation source identifier transmitted to the terminal device.

(c) The user registration information is stored in the user registration information database (column 5, lines 15-17). A registration module stored at the client device also stores the registration website identifier in order that it may contact the registration website and communicate information (column 6, lines 29-32, 42-48). Therefore, Klug discloses a generation source identifier storage means for storing generation source identifier.

### ***Conclusion***

4. Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the

shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Barbara N. Burgess whose telephone number is (571) 272-3996. The examiner can normally be reached on M-F (8:00am-4:00pm).

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Ario Etienne can be reached on (571) 272-4001. The fax phone number for the organization where this application or proceeding is assigned is 703-872-9306.

Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through Private PAIR only. For more information about the PAIR system, see <http://pair-direct.uspto.gov>. Should you have questions on access to the Private PAIR system, contact the Electronic Business Center (EBC) at 866-217-9197 (toll-free).
